JEREMIAH OLUWAKOYA

Lagos, Nigeria | (+234) 708 367 5423 | oluwakoyajeremiah@gmail.com
Portfolio: jriffs.github.io | GitHub: github.com/jriffs | LinkedIn: linkedin.com/in/jeremiah-oluwakoya-824957243

PROFESSIONAL SUMMARY

Software Engineer and full-stack developer with hands-on experience building browser extensions, microservices, CLI tools, and Solana blockchain applications. Proficient in Rust, JavaScript/TypeScript, Node.js, Anchor, and modern web technologies. Strong problem-solving skills with a focus on practical, auditable systems and open-source contributions. Passionate about developer tooling, distributed systems, and Web3.

TECHNICAL SKILLS

Languages: Rust, JavaScript, TypeScript, Node.js, PHP (basic), Java (basic)
Frontend / Web: Svelte, HTML/CSS, Browser Extension APIs, Dynamic Script Injection
Backend & APIs: REST APIs, Express.js, Microservices Architecture, Authentication Systems
Blockchain / Web3: Solana, Anchor Framework, Web3.js, SPL Tokens, Smart Contracts (Devnet)
Distributed Systems: Microservices, Message-driven design, Fault-tolerant patterns, System integration
Databases & Tools: MySQL, MongoDB, Redis, Firebase, Git, Docker basics
Other: CLI Tool Development, Open-Source Contribution, Technical Documentation

PROFESSIONAL EXPERIENCE

Freelance Software Engineer | Self-Employed

2022 – Present | Lagos, Nigeria

Proprietary Stock Brokerage Platform (Executed under NDA)

- Architected and deployed a highly scalable, distributed backend system designed for high-concurrency financial operations.
- Developed a responsive user dashboard integrated with live market data polling engines and real-time trade analytics.
- Designed secure, low-latency transactional pipelines ensuring seamless, ACID-compliant user deposits and withdrawals.

Stealth-Mode Crypto Wealth & Asset Manager (Executed under NDA)

- Built the backend infrastructure and client interface for a proprietary digital asset investment application.
- Integrated multi-source cryptocurrency data feeds to power real-time portfolio tracking and asset performance metrics.
- Implemented high-throughput ledger services to manage distributed financial transactions and secure capital movement.

CDS President – Financial Inclusion Group | National Youth Service Corps (NYSC)

May 2022 – January 2023 | Nsukka, Enugu State

- Led a team of corps members in planning and delivering community education initiatives on digital financial services.
- Coordinated stakeholder engagement, logistics, reporting, and documentation — demonstrating project ownership transferable to engineering teams.

SELECTED PROJECTS

Drip Token – Solana SPL Token Faucet

Tech: Solana, Anchor, Rust, Web3.js, SPL Tokens | Portfolio: jriffs.github.io

- Built a production-quality, intentionally simple SPL token faucet on Solana (Devnet). Users claim a fixed amount of a configured SPL token with enforced per-user cooldown and/or rolling 24-hour daily limit.
- Supports both mint and transfer modes; designed for clarity, safety, and easy auditing of the on-chain program.

Voisascript – Browser Extension for Voice-Annotated Code

Tech: TypeScript, Svelte, Node.js, Microservices | github.com/jriffs

- Built a cross-platform browser extension that lets developers attach voice explanations to code and embed shareable audio links directly in GitHub comments.
- Architected supporting microservices for authentication and file/audio storage; implemented dynamic content script injection for seamless in-repo playback widgets.

Dapr Open-Source Contribution (js-sdk)

Tech: JavaScript | github.com/dapr/js-sdk (PR #508)

- Improved error handling by introducing structured error classes (GRPCNotSupportedError, HTTPNotSupportedError), enhancing clarity and maintainability for the Dapr JavaScript SDK community.

Rust CLI Tools & 100 Days of Solana

Tech: Rust, Solana, Anchor, JavaScript | github.com/jriffs

- Developed multiple command-line applications (file explorer, guessing game) to strengthen systems programming and memory-safe development.
- Actively completing the 100 Days of Solana challenge with Anchor programs and wallet integrations for practical blockchain experience.

EDUCATION

Higher National Diploma (HND) in Statistics

Yaba College of Technology, Lagos | May 2015 – November 2020

Specialization: Econometrics / Economic Statistics

ADDITIONAL INFORMATION

Industrial Training: Mechatronics & Automation Trainee at Institute for Industrial Technology (IIT), Lagos — strengthened systems thinking, troubleshooting, and technical documentation skills.

Interests: Open-source collaboration, developer tooling, blockchain, continuous learning, technical writing.
